

ANIL KUMAR MEENA

✉ anilm7017@gmail.com  Anil-K.  J33rry  J3rry7017

Summary

Full-stack and mobile developer at NIT Delhi with a proven track record of building scalable, containerized applications and multi-service architectures using React Native, Next.js, and Node.js.

Education

National Institute of Technology Delhi

2023 – 2027

B.Tech in Electrical Engineering (Minor: AI/ML)

Experience

Executive — UpVision Tech Club

2025 – Present

National Institute of Technology Delhi

Delhi, India

- Organised **HackIndia Spark 6** — a **24-hour hackathon** — managing end-to-end logistics, participant coordination, and on-ground execution.
- Led cross-functional teams to coordinate event assets, scheduling, judging panels, and problem statement design across both events.

Software Developer — Justoo Campus Delivery Platform

2025 – Present

National Institute of Technology Delhi | [Github](#)

Under Director, NIT Delhi

- Co-built an institute-wide campus delivery platform using a **Turborepo monorepo** (pnpm workspaces), implementing a **Gateway Pattern** where a single Express.js server routes traffic across 4 independent service backends (Admin, Customer, Inventory, Rider).
- Developed the **React Native** Customer app (Expo) with product browsing, cart, checkout, order tracking, and address management; all services share a unified PostgreSQL schema via a **Drizzle ORM** workspace package.
- Built 4 **Next.js 15** (React 19) dashboards for distinct roles; secured all services with **JWT + httpOnly cookies** and role-based access control; deployed web clients on Vercel.

Projects

Cozer – CP Stats Tracker | *React Native, Node.js, Firebase, PostgreSQL, Drizzle ORM, Docker* | [App](#) | [API](#)

- Built a cross-platform mobile app (React Native + Expo Router) aggregating **LeetCode & Codeforces** stats, daily problems, contest schedules, and a searchable problem browser into a unified dashboard.
- Engineered a production REST API with **Firebase Auth** middleware, rate limiting, and protected routes; containerized with **Docker** and deployed on **Azure App Service** for consistent production environments.
- Built a **Puppeteer + Cheerio** scraping pipeline with **PostgreSQL + Drizzle ORM** caching, and automated push notifications via **Firebase Cloud Messaging** using node-cron jobs.

Demon's Bar – Real-Time Chat App | *MERN Stack, Socket.io, Cloudinary* | [GitHub](#)

- Built a full-stack chat app with **Socket.io** WebSockets for bidirectional real-time messaging, JWT authentication, and **Cloudinary**-backed profile picture uploads.
- Implemented multi-theme UI switching with DaisyUI + Tailwind CSS; deployed frontend and backend on **Render**.

SecureVault — Digital Credential Manager | *Next.js, Supabase, Clerk, Nodemailer* | [GitHub](#)

- Built a secure digital inheritance platform with **Clerk** authentication, email-based **2FA** via Nodemailer, and an intuitive UI for managing sensitive credential lifecycles on Supabase.

Skills

Languages: C++, Python, JavaScript (ES6+), SQL

Frontend: React.js, Next.js 15, React Native (Expo), Tailwind CSS, NativeWind, GSAP, DaisyUI, Material UI

Backend: Node.js, Express.js, Socket.io, Firebase Admin SDK, Puppeteer, Cheerio, node-cron

Databases: MongoDB, PostgreSQL, Drizzle ORM, Supabase, NeonDB

Cloud & DevOps: Docker, Turborepo, Azure App Service, Vercel, Render, Firebase (Auth, FCM), Clerk, Git/GitHub

Concepts: DSA, DBMS, OOP, Computer Networks, System Design, REST APIs, WebSockets, Gateway Pattern

Problem Solving: 170+ Problems Solved on LeetCode (C++)
